

THE LOFT

18 X 20 KITCHEN

BRICK WALL WITH 12' OF CABINETS ACCESS VIA LIBRARY LADDER

CUSTOM GARDEN CABINETS CREATING AN INDOOR GARDEN AREA

The design for this loft kitchen space was inspired by the pre-existing 20' high brick walls and windows, as well as the concrete floor. Desiring to maintain the warehouse feeling and atmosphere; re-purposed, modular, eclectic pieces were brought in to furnish the space. A combination of white cabinetry was used, alongside some red French café-esque pieces and birch and black cabinets on stainless steel feet. Countertops are comprised of black marble, white marble, and butcher block with the backsplash done in an antique black and white damask tile.
